Washington State
Department of Social & Health Services

DDA Developmental
Disabilities Administration

April 24, 2025	1 PM to 4 PM	3 CEUs

Fetal Alcohol Spectrum Disorder

Supporting individuals with Neurodevelopmental disorder and/or mental health issues does require understanding of the origins of these disorders. This course will provide an introduction to Fetal Alcohol Spectrum Disorder (FASD), its causes, and how to support these individuals.

- Different disorders under Fetal Alcohol Spectrum.
- Causes for FASD.
- Neurological effects on the developing brain.
- Behavioral impacts.
- Supports for people identified with FASD.

Participants will be introduced to the spectrum, which is not a diagnosis.

Presented by Edward Fischer, PsyD

Dr. Fischer has worked 21 years with individuals with developmental disabilities and Autism. He works for the Developmental Disabilities Administration in Region 3 with the Regional Clinical Team. He is also associate faculty at two universities where he teaches clinical and forensic psychology and serves as dissertation chair and committee member.

*This training will be presented virtually and highly interactive. Participants should have the ability to access MS Teams platform.
