Purpose: DDA is adopting a new chapter of rules on an emergency basis to implement Engrossed Substitute Senate Bill 5950 (2024), which directs DSHS to "to operate a staff-secure, voluntary, and transitional treatment facility specializing in services for adolescents over the age of 13 who have complex developmental, intellectual disabilities, or autism spectrum disorder and may also have a mental health or substance use diagnosis." Services must be provided at the property of Lake Burien and be implemented in a way that prioritizes discharge to a less restrictive community-based setting. The emergency rules will establish service eligibility criteria, responsibilities for involved parties, administrative hearing rights, and more.

Citation of rules affected by this order:

EMERGENCY RULE

Under RCW 34.05.350 the agency for good cause finds:

- That immediate adoption, amendment, or repeal of a rule is necessary for the preservation of the public health, safety, or general welfare, and that observing the time requirements of notice and opportunity to comment upon adoption of a permanent rule would be contrary to the public interest.
 That state or federal law or federal rule or a federal deadline for state receipt of federal funds requires immediate adoption of a rule.

Reasons for this finding:

In the 2024 legislative session, the Legislature has authorized and directed DSHS/DDA "to operate a staff-secure, voluntary, and transitional treatment facility specializing in services for adolescents over the age of 13 who have complex developmental, intellectual disabilities, or autism spectrum disorder and may also have a mental health or substance use diagnosis." The Legislature has specified that "[t]hese individuals require intensive behavioral supports and may also be in need of behavioral health services."

Currently there are a significant number of children admitted to acute care facilities without medical need to remain. There are also children who have been sent out of state, away from their families, for services because no other option was available in Washington state to provide the necessary level of support. These children have an immediate need – which can be met by the youth transitional care facility – for age-appropriate, holistic, co-occurring disorder treatment and therapies.

From January 1, 2024, to present, DDA data show that there were 77 DDA-eligible youth with a diagnosis of I/DD, ASD, and a mental health diagnosis under the age of 18 who were hospitalized and unable to discharge due to a lack of appropriate placement or supports as determined by the youth's treating professional. The YTFC will provide specialized treatment using adaptive, evidence-based treatment modalities to meet the needs of this population. The YTFC was created to fill the gap in the continuum of care for youth with these co-occurring diagnoses.
